Course Information Sheet for entry in 2024-25: DPhil in Chemistry

Course facts

Mode of study	Full Time Only
Expected length	3 to 4 years

The main aspect of the course is an original research project, which develops research skills, knowledge and expertise in an area of cutting-edge chemistry. You will work with one or more academic supervisors, on a project that falls within the department's research themes:

- Advanced Functional Materials and Interfaces
- Catalysis
- Chemistry at the interface with Biology and Medicine
- Energy and Sustainable Chemistry
- Innovative Measurement and Photon Science
- Kinetics, Dynamics and Mechanism
- Synthesis
- Theory and Modelling in the Chemical Sciences

Many students work on projects that cut across the traditional boundaries of chemistry, and some work in interdisciplinary fields that exploit the department's strong connections with other departments of the University.

A typical week would primarily be spent carrying out your research, along with attending research group meetings, preparing reports, and keeping up-to-date with the scientific literature. You will also have access to a range of training opportunities, including specialist training within the department on key research techniques. Alongside your research project, you will be expected to develop your transferable skills, and many courses and opportunities for this are provided by the Mathematical, Physical and Life Sciences division and the wider University.

The Department of Chemistry has a strong and vibrant research community, of which you will become part, and you will be encouraged to attend a range of events including seminar series, lectures from distinguished visiting researchers, and the annual Graduate Symposium.

Supervision

The allocation of graduate supervision for this course is the responsibility of the Department of Chemistry and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Department of Chemistry.

You will join a research group supervised by one or more members of the Department of Chemistry, sometimes in collaboration with other departments.

If you require specific help to adjust to an academic programme or to develop a new range of skills, your supervisor will work with you to ensure that you have additional support.

All students have meetings with their research supervisors to discuss and review their progress. These typically occur weekly or fortnightly.

Assessment

You will be admitted as a Probationary Research Student. At the end of the first year, you will undergo a Transfer of Status assessment, to ensure that you have the potential to gain a doctorate. This assessment is made by independent assessors on the basis of a report, a short presentation and an oral examination. Assuming that you satisfactorily transfer to DPhil status, your research proceeds with quarterly reporting throughout the rest of your course. By the end of the third year, you must pass the Confirmation of Status assessment, to ensure that you are on track to complete the thesis within a reasonable time.

You will be expected to submit a DPhil thesis within, at most, four years from the date of admission. Your thesis will be read by two examiners, one of whom is normally from Oxford and one from elsewhere, and you will be assessed via the thesis and an oral (viva voce) examination. The examiners will judge, along with other requirements, whether you have made a significant and substantial contribution to your particular field of learning.

Changes to this course

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after you commence your course. These might include significant changes made necessary by any pandemic, epidemic or local health emergency. For further information, please see the University's Terms and Conditions

(http://www.graduate.ox.ac.uk/terms) and our page on changes to courses (http://www.graduate.ox.ac.uk/coursechanges).

Costs

Annual fees for entry in 2024-25

Fee status	Annual Course fees	
Home	£9,500	
Overseas	£31,480	

Information about course fees

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (http://www.graduate.ox.ac.uk/terms).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2024-25 is £628, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600. Please contact your college for more details, including information about whether your college's continuation charge is applied at a different rate for part-time study.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2024-25 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs for one month

	Lower range	Upper range
Food	£315	£495
Accommodation	£745	£925
Personal items	£190	£320
Social activities	£40	£95
Study costs	£35	£85
Other	£20	£35
Total	£1,345	£1,955

Likely living costs for nine months

	Lower range	Upper range
Food	£2,835	£4,445
Accommodation	£6,705	£8,325
Personal items	£1,710	£2,880
Social activities	£360	£855
Study costs	£315	£765
Other	£180	£315
Total	£12,105	£17,595

Likely living costs for twelve months

	Lower range	Upper range
Food	£3,780	£5,940
Accommodation	£8,940	£11,100
Personal items	£2,280	£3,840
Social activities	£480	£1,140
Study costs	£420	£1,020
Other	£240	£420
Total	£16,140	£23,460

When planning your finances for any future years of study at Oxford beyond 2024-25, it is suggested that you allow for potential increases in living expenses of 5% or more each year – although this rate may vary depending on the national economic situation.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.

Document accessibility

If you require an accessible version of this document please contact Graduate Admissions and Recruitment by email (graduate.admissions@admin.ox.ac.uk) or via the online form (http://www.graduate.ox.ac.uk/ask).
