

Course Information Sheet for entry in 2017-18

MPhil in Environmental Change and Management

About the course

The MPhil in Environmental Change and Management aims to give you a broad appreciation of all aspects of the management of people and institutions in relation to environmental change, you will become analytical in your approach, and a competent and aware decision maker. The second year is devoted to researching and writing a thesis of 30,000 words.

The MPhil is a two year course. In the first year, you will take the coursework associated with the MSc in Environmental Change and Management. This course has three overarching aims, to:

- examine the nature, causes and impacts of major types of environmental change. How do these changes operate and interact on global, regional and local scales? How do they relate to critical social and ecological systems?
- examine the economic, legal, cultural, and ethical underpinnings of environmental responsibility and systemic solutions, including mitigation, adaptation, remediation, enhanced resource stewardship and other sustainable responses to environmental change at different scales and within different organisational contexts; and
- empower environmental leaders to address the world's most pressing environmental problems through an understanding of and training in the key analytical and practical skills, and in a broad appreciation of earth systems and societies in relation to environmental change.

These aims are pursued through an introductory course, 'Welcome to the Anthropocene', and seven core modules: 'The Earth system and its fundamental processes', 'Ecosystems', 'Human systems and environmental change', 'Environmental economics and policy', 'Energy systems and climate mitigation', 'Sustainable responses to environmental change' and 'Governing the Anthropocene'.

Teaching takes place through lectures, seminars and workshops which provide in-depth exploration of key issues. The elective modules offer a tutorial-style teaching and discussion environment within smaller groups, based on a suite of contemporary research themes that reflect the specific interests of core faculty and visiting research associates. The teaching aim is to foster discussion and debate between academic staff and students to identify and explore theory, methods and practice in an academic space that encourages a critical dialogue. In the second year you will work on your thesis project with the support of a specialist supervisor.

Fieldwork and external visits are an important part of the teaching programme and include coastal and marine environmental change sites, renewable energy technologies and a visit to the European Parliament.

At the end of the first year you take the examinations associated with the MSc in Environmental Change and Management. You must pass the examinations taken at the end of the first year in order to proceed into the second year. In the first year there are two assessed essays linked to elective courses.

The second year is devoted to researching and writing a thesis of 30,000 words. The research topic will be devised in your first year and, once approved; a supervisor will be allocated to you. The thesis

accounts for half the marks for the degree. In addition, in the second year you will take a further elective course, assessed by a submitted essay.

Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

24 months

Annual fees for entry in 2017-2018

Fee Status	Tuition fee	College fee	Total annual fees
Home/EU (including islands)	£13,545	£3,021	£16,566
Overseas	£19,335	£3,021	£22,356

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

All costs associated with compulsory fieldwork are paid for by the department except for meals or snacks in transit. This excludes the costs associated with obtaining the appropriate visa required to attend the non-UK based field trips. Non-EEA nationals might require a visa in order to travel to the country where the field trip is being held and any costs associated with obtaining the appropriate travel visa is the responsibility of the student.

If you choose to attend an optional field trip to Brussels, you will need to fund your own travel and accommodation costs, which the department estimates will total around £200. You may be eligible to apply to the Environmental Change Institute for financial assistance for the Brussels field trip in the event of no other funding (eg college funding) being available.

Furthermore, as part of your course requirements you need to develop and research a dissertation topic. Depending on your choice of topic and the field work research required to complete it, you may incur additional costs (eg relating to travel, accommodation, field assistants, lab fees and/or research visas). You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2017-18 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£250	£350	£2,250	£3,150	£3,000	£4,000
Accommodation	£538	£619	£4,844	£5,569	£6,459	£7,425
Personal items	£115	£255	£1,035	£2,295	£1,380	£3,060
Social activities	£40	£119	£358	£1,073	£477	£1,431
Study costs	£38	£83	£338	£743	£451	£991
Other	£22	£45	£196	£407	£261	£543
Total	£1,002	£1,471	£9,021	£13,237	£12,028	£17,649

When planning your finances for any future years of study in Oxford beyond 2017-18, you should allow for an estimated increase in living expenses of 2% each year.

More information about how these figures have been calculated is available at www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs.
