

Course Information Sheet for entry in 2017-18

MPhil in Sociology and Demography

About the course

The MPhil introduces students to contemporary theories and research methods on the intersection of sociology and demography. This 21-month programme takes a life-course and multilevel approach, aiming to integrate micro and macro issues in analysing social problems and the causes and consequences of population change.

The course will prepare you for doctoral work in sociology and demography and research-intense jobs.

The curriculum emphasises:

- population-level analysis and demographic measures
- a life course approach
- sociological analysis as the key approach to explanation
- advanced quantitative methods.

This emphasis is reflected in the compulsory papers. Optional papers and the thesis will reflect either a more specialised topic (eg gender, family and fertility, migration and integration of migrants, health and mortality, intergenerational relationships) or methodological work.

The MPhil programme has the following components:

- Sociological Analysis paper taught in the first year through lectures and seminars, assessed by an unseen examination
- Demographic Analysis paper taught in the first year through lectures, seminars and computer labs, assessed through a combination of examination and assignments
- Life Course Research paper taught in the first year through lectures, seminars and computer labs, assessed through a combination of methods
- Statistical Methods paper taught in the first year through lectures and computer labs, assessed through a combination of a test and assignments
- Research Design paper taught in the first year through lectures, assessed via a combination of methods
- two optional papers over both years of the MPhil, normally taught through eight weekly classes/seminars for each paper and assessed by unseen examination or appropriate coursework
- Replication project in the second year, comprising a combination of individual and group work and assessed via assignments
- MPhil thesis, a new and substantial analysis of up to 30,000 words on a sociological and/or demographic topic, to be submitted by the end of the second year

Please note that the optional papers available may vary from year to year.

Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

21 months

Annual fees for entry in 2017-2018

Fee Status	Tuition fee	College fee	Total annual fees
Home/EU (including islands)	£8,715	£3,021	£11,736
Overseas	£16,770	£3,021	£19,791

The fees shown above are the annual tuition and college fees for this course for entry in the stated academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

You are not formally required to undertake field research for your dissertation. However, if you decide to undertake fieldwork as part of your studies, you should note that you will ordinarily have to meet all the costs yourself. These costs are likely to include, but may not be limited to, travel, accommodation and living expenses, insurance and, where appropriate, visa and medical fees (e.g. for vaccinations). Costs can vary considerably according to the duration and location of the fieldwork, but the department would generally expect the cost of such field research to range from £200 to £1,000. If you choose to collect your own data, you may also incur transcription costs. There may also be costs if you choose to acquire quantitative data from non-ESRC sources.

The department has no funds available to help with these costs.

Living costs

In addition to your fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2017-18 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£250	£350	£2,250	£3,150	£3,000	£4,000
Accommodation	£538	£619	£4,844	£5,569	£6,459	£7,425
Personal items	£115	£255	£1,035	£2,295	£1,380	£3,060
Social activities	£40	£119	£358	£1,073	£477	£1,431
Study costs	£38	£83	£338	£743	£451	£991
Other	£22	£45	£196	£407	£261	£543
Total	£1,002	£1,471	£9,021	£13,237	£12,028	£17,649

When planning your finances for any future years of study in Oxford beyond 2017-18, you should allow for an estimated increase in living expenses of 2% each year.

More information about how these figures have been calculated is available at www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs.
