Course Information Sheet for entry in 2016-17

MSc in Nature, Society and Environmental Governance

About the course

This course is grounded in the conviction that responses to political and environmental challenges requires researchers and practitioners trained in the social sciences, with the ability to think flexibly across disciplinary and sectorial boundaries. It will enable you to develop a theoretically sophisticated and empirically grounded understanding of the dynamic relations between environment, society and policy.

The rate and complexity of environmental change poses profound economic, social and political challenges for contemporary society. Developing ways to address these challenges demands intellectual rigour, innovation and flexibility, as well as the capacity to think across existing disciplinary boundaries.

This course aims to help you develop a theoretically sophisticated and empirically grounded understanding of the dynamic relations between environment, society and policy. To this end the course draws on the methods and approaches from across the social sciences, including fields such as human geography, anthropology, environmental economics, science and technology studies, and corporate environmental management. It also facilitates dialogue between researchers and practitioners concerning contemporary issues of environmental policy and politics.

Teaching takes place through lectures, seminars and workshops which provide in-depth exploration of key environmental issues. Fieldtrips and external visits are an important component of the teaching delivery and include an induction field course in the UK and a three-day European field course.

The specific objectives of the course are:

to provide broad and critical engagements with key debates in the environmental social sciences, focussing on the relations between nature-society, science-politics and economy-development

to foster an understanding of the applied practices of environmental policy and the challenges of real-world environmental governance

to develop your conceptions of, and skills in, the methods and practices of contemporary environmental social sciences, providing critical foundations for further study by research

to integrate you into world leading research in the School of Geography and the Environment by providing core teaching and supervision by research-active staff

to enhance your personal and professional development.

There are nine core modules organised under three themes: Policy and Governance, Theory and Analysis, and Research Skills. These modules are assessed by written examination. You will also study two electives which are each assessed through a 4000 word essay. You will also write an individual dissertation of 15,000 words.

Elective modules

These offer a tutorial-style teaching and discussion environment within smaller groups, based on a suite of contemporary research themes that reflect the specific interests of core faculty and visiting research associates. The teaching aim is to foster discussion and debate between academic staff and students to identify and explore theory, methods and practice in an academic space that encourages a critical dialogue.

Dissertation

An independent and original dissertation is an integral component of the course. In order to equip you with the necessary skills to undertake high quality research, a suite of training activities is offered to develop key transferable skills in order for you to be able to execute high quality independent and original research, and to expose students to applied research methods used widely in academic and professional research.

Changes to courses

The University will seek to deliver each course in accordance with the descriptions set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after registration. For further information, please see the University's Terms and Conditions.

Expected length of course

12 months

Annual fees for entry in 2016-2017

Fee Status	Tuition fee	College fee	Total annual fees	
Home/EU	£13,150	£2,933	£16,083	
(including islands)				
Overseas	£18,770	£2,933	£21,703	

The fees shown above are the annual tuition and college fees for this course for entry in the 2016-17 academic year; for courses lasting longer than one year, please be aware that fees will usually increase annually. For details, please see our guidance on likely increases to fees and charges.

Tuition and college fees are payable each year for the duration of your fee liability (your fee liability is the length of time for which you are required to pay tuition and college fees).

Additional cost information

All costs associated with compulsory fieldwork are paid for by the department.

Living costs

In addition to your fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

The likely living costs for 2016-17 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

	Likely living costs for 1 month		Likely living costs for 9 months		Likely living costs for 12 months	
	Lower range	Upper range	Lower range	Upper range	Lower range	Upper range
Food	£265	£298	£2,384	£2,673	£3,177	£3,565
Accommodation	£469	£667	£4,221	£6,002	£5,627	£8,006
Personal items	£119	£244	£1,073	£2,187	£1,429	£2,915
Social activities	£60	£107	£539	£960	£718	£1,280
Study costs	£36	£73	£314	£661	£418	£880
Other	£19	£44	£197	£410	£265	£547
Total	£970	£1,433	£8,727	£12,894	£11,636	£17,191

When planning your finances for any future years of study in Oxford beyond 2016-17, you should allow for an estimated increase in living expenses of 2% each year.

More information about how these figures have been calculated is available at www.ox.ac.uk/admissions/graduate/fees-and-funding/living-costs.
