

Course Information Sheet for entry in 2024-25: DPhil in Medical Sciences

Course facts

Mode of study	Full Time	Part Time
Expected length	3-4 years	6-8 years

About the course

Based in the Radcliffe Department of Medicine (RDM), this DPhil research programme is aimed at basic scientists and clinicians with an interest in pursuing research in a scientific field related to medicine, particularly in cardiovascular medicine, diabetes, endocrinology and metabolism, epidemiology and clinical trials, haematology and pathology, immunology, regenerative medicine and stem cells, and acute stroke.

You will be admitted directly onto a research project with one of RDM's world-leading scientists, who will act as your supervisor. In most cases, students choose a project from our advertised project list, but in some cases, students design their own project in collaboration with their proposed supervisor. In either case, you will be expected to play an active role in shaping your project over the course of the DPhil. Graduate students are a valuable part of the department and they are encouraged to be involved with the scientific and social life of the department at all levels.

Your project and development during your DPhil studies will be guided by a specialised team led by your academic supervisor.

Your training will be tailored to your particular needs, drawing from the vast range of training available at Oxford and covering both specialist scientific methods and techniques and transferable skills. Please note that there is no formal taught component of the DPhil in Medical Sciences.

Much of your training will take place in the lab, where you will be trained by your supervisor or members of the lab team in the variety of techniques and protocols used. A brief statement of the training you will receive in the lab is included in the training description of your chosen project.

As a member of the Medical Sciences Graduate School you will be entitled to enrol on courses run by the Medical Sciences Skills Training programme. You will be able to attend the wide variety of sessions covered through the MRC Weatherall Institute of Molecular Medicine (WIMM) Methods and Techniques course. RDM also runs a successful mentoring scheme, which all students are encouraged to join.

Part-time study

It is possible to study for a doctorate on a part-time basis. Completing the DPhil on a part-time basis normally requires between six and eight years of study, compared with a full-time DPhil which normally takes three to four years to complete. Part-time study is not suitable for all projects and you will need to check with your supervisor that they are able to accommodate part-time study.

As a part-time student, attendance is required for a minimum of thirty days of university-based work each year, to be arranged with the agreement of their supervisor, for the period that their names remain on the Register of Graduate Students unless individually dispensed by the Board. During a candidate's probationary period the attendance arrangements must take account of relevant induction and training events scheduled by the Board. You will have the opportunity to tailor your part-time research in liaison with your supervisor and agree your pattern of attendance.

Supervision

The allocation of graduate supervision for this course is the responsibility of the Radcliffe Department of Medicine and it is not always possible to accommodate the preferences of incoming graduate students to work with a particular member of staff. Under exceptional circumstances a supervisor may be found outside the Radcliffe Department of Medicine.

As well as your academic supervisor, students also have one or more formal co-supervisors, who can provide additional scientific and/or practical advice in their specialist areas and offer another viewpoint on the student's project. Together, they form the specialised team that will advise you on your academic progress. Most students usually meet with their supervisor at least once a month.

You will also have the support of a Graduate Advisor, the Director of Graduate Studies and the Graduate Studies Manager. All activity relating to graduate students within the department is overseen by the Graduate Studies Committee.

Assessment

All students will be initially admitted to the status of Probationer Research Student (PRS). Within a maximum of six terms as a full-time PRS student or twelve terms as a part-time PRS student, you will be expected to apply for transfer of status from Probationer Research Student to DPhil status. This application is normally made by the fourth term for full-time students and by the eighth term for part-time students.

A successful transfer of status from PRS to DPhil status will require a written report outlining your project plans and data obtained so far. Students who are successful at transfer will also be expected to apply for and gain confirmation of DPhil status to show that your work continues to be on track. This will need to be done within nine terms of admission for full-time students and eighteen terms of admission for part-time students.

Both milestones normally involve an interview with two assessors who are not directly involved in your supervision and therefore provide important experience for the final oral examination.

Full-time students will be expected to submit an original thesis of 50,000 words after three or, at most, four years from the date of admission. If you are studying part-time, you will be required to submit your thesis after six or, at most, eight years from the date of admission. To be successfully awarded a DPhil in Medical Sciences you will need to defend your thesis orally (viva voce) in front of two appointed examiners.

Changes to this course

The University will seek to deliver this course in accordance with the description set out above. However, there may be situations in which it is desirable or necessary for the University to make changes in course provision, either before or after you commence your course. These might include significant changes made necessary by any pandemic, epidemic or local health emergency. For further information, please see the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>) and our page on changes to courses (<http://www.graduate.ox.ac.uk/coursechanges>).

Costs

Annual fees for entry in 2024-25

Full-time study

Fee status	Annual Course fees
Home	£9,500
Overseas	£31,480

Part-time study

Fee status	Annual Course fees
Home	£4,750
Overseas	£15,740

Information about course fees

Course fees are payable each year, for the duration of your fee liability (your fee liability is the length of time for which you are required to pay course fees). For courses lasting longer than one year, please be aware that fees will usually increase annually. Information about how much fees and other costs may increase is set out in the University's Terms and Conditions (<http://www.graduate.ox.ac.uk/terms>).

Course fees cover your teaching as well as other academic services and facilities provided to support your studies. Unless specified in the additional cost information (below), course fees do not cover your accommodation, residential costs or other living costs. They also don't cover any additional costs and charges that are outlined in the additional cost information.

Graduate students who have reached the end of their standard period of fee liability may be required to pay a termly University and/or a college continuation charge.

The University continuation charge, per term for entry in 2024-25 is £628, please be aware that this will increase annually. For part-time students, the termly charge will be half of the termly rate payable by full-time students.

If a college continuation charge applies (not applicable for non-matriculated courses) it is likely to be in the region of £100 to £600. Please contact your college for more details, including information about whether your college's continuation charge is applied at a different rate for part-time study.

Additional cost information

There are no compulsory elements of this course that entail additional costs beyond fees (or, after fee liability ends, continuation charges) and living costs. However, please note that, depending on your choice of research topic and the research required to complete it, you may incur additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Part-time study

Please note that you are required to attend in Oxford for a minimum of 30 days each year, and you may incur additional travel and accommodation expenses for this. Also, depending on your choice of research topic and the research required to complete it, you may incur further additional expenses, such as travel expenses, research expenses, and field trips. You will need to meet these additional costs, although you may be able to apply for small grants from your department and/or college to help you cover some of these expenses.

Living costs

In addition to your course fees, you will need to ensure that you have adequate funds to support your living costs for the duration of your course.

If you are studying part-time your living costs may vary depending on your personal circumstances but you must still ensure that you will have sufficient funding to meet these costs for the duration of your course.

The likely living costs for 2024-25 are published below. These costs are based on a single, full-time graduate student, with no dependants, living in Oxford. We provide the cost per month so you can multiply up by the number of months you expect to live in Oxford.

Likely living costs for one month

	Lower range	Upper range
Food	£315	£495
Accommodation	£745	£925
Personal items	£190	£320
Social activities	£40	£95
Study costs	£35	£85
Other	£20	£35
Total	£1,345	£1,955

Likely living costs for nine months

	Lower range	Upper range
Food	£2,835	£4,445
Accommodation	£6,705	£8,325
Personal items	£1,710	£2,880
Social activities	£360	£855
Study costs	£315	£765
Other	£180	£315
Total	£12,105	£17,595

Likely living costs for twelve months

	Lower range	Upper range
Food	£3,780	£5,940
Accommodation	£8,940	£11,100
Personal items	£2,280	£3,840
Social activities	£480	£1,140
Study costs	£420	£1,020
Other	£240	£420
Total	£16,140	£23,460

When planning your finances for any future years of study at Oxford beyond 2024-25, it is suggested that you allow for potential increases in living expenses of 5% or more each year – although this rate may vary depending on the national economic situation.

More information about how these figures have been calculated is available at www.graduate.ox.ac.uk/livingcosts.

Document accessibility

If you require an accessible version of this document please contact Graduate Admissions and Recruitment by email (graduate.admissions@admin.ox.ac.uk) or via the online form (<http://www.graduate.ox.ac.uk/ask>).
